Thousands of men Will Want This . . .

Dealers: Here's your opportunity to get in on this highly profitable field.

Regular Millers Falls ¼" Standard Electric Drill for power plant. Easily demounted for use as portable.

The size, power and trouble-free performance of this drill alone puts this Toolshop in a class by itself.

It grips the imagination of the mechanically-minded man.

SHOW IT *and* SELL IT!

Display the New Electric Toolshop in your window, with the carrying-case and accessory equipment.

Boost Your Christmas Profits

Here's one Christmas gift that both Dad and Junior will get a heap of fun out of—together or separately.

Boost the New Electric Toolshop for Christmas trade — and you'll give your Christmas profits a big boost.

Time N O W for jobbers and dealers to stock up for holiday business.

Feature its low price so passersby can't miss it

Remind the shopper what he can make with it: furniture, chests, cabinets, garden seats and trellisses, window boxes — —

Tell him about the wire end-brush which can be used to loosen up carbon in his automobile, by dipping it through the spark plug holes. Show him the emery wheel, wire brush, buffer and other attachments — and the wood and metal-working tools.

The new Electric Toolshop is *another* reason why it pays to concentrate on Millers Falls Twelve Major Tool Lines.

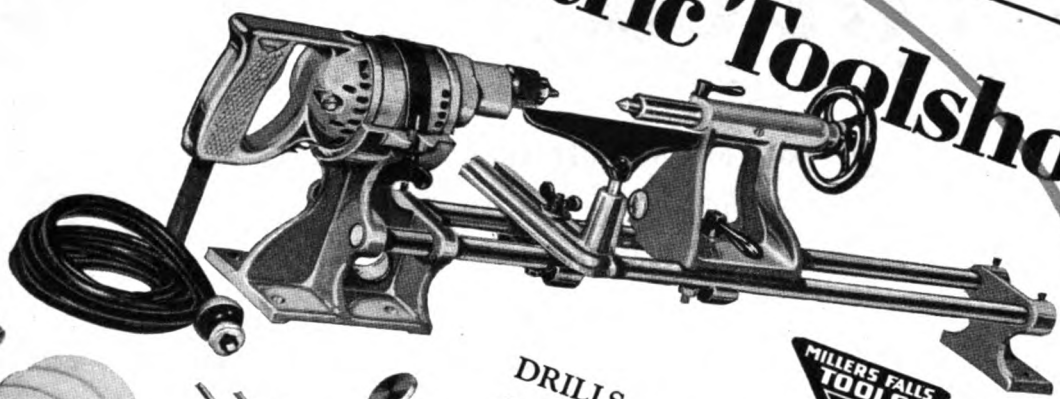
New Electric Toolshop



MILLERS FALLS TOOLS SINCE 1868

DRILLS · TURNS · GRINDS
SAWS · SANDS · BUFFS · POLISHES

PROMISE yourself a big new thrill with this New Electric Toolshop. You won't be disappointed. It has energy and reserve power beyond anything you've ever expected in a home workshop. It's the Toolshop you've always wanted but have never been able to find . . . a man-sized outfit with a motor that doesn't lie down on the job.

NOW — "making things" becomes easy and fast — furniture, lamps, cabinets—all sorts of wood and metal-turning jobs—toys, boats, garden trellisses, magazine and pipe racks — hundreds of useful and fancy articles of wood and metal — easy to make with this power Toolshop. Your hands don't tire and lose their accuracy.

Big labor-saver 'round the house and garage — 5 seconds to demount the power unit and you have a sturdy electric drill that takes all the toughness out of household repair jobs, removing carbon from your automobile — grinding, buffing, and polishing.

Drilling metal takes seconds or minutes, instead of half hours or hours.

The New Electric Toolshop is 36" long and 10" high, attractively enameled in red and black. Comes packed complete, except lathe-bed, in steel carrying-case 9 x 16½ x 7⅝", equipped with leather handle and strong hasp fastener.

See it at your hardware dealer's. Compare it with any other workshop on the market—*at any price.* You'll be amazed at its sturdy quality and *low price.*

Only $68.00
including steel carrying-case

If your dealer cannot supply you, write for name of one who can. Address, MILLERS FALLS CO., Millers Falls, Mass.
